RAYMOND ANTHONY GOMEZ

AI PROTOTYPE BUILDER | PRODUCT DISCOVERY | DECISION SUPPORT

Orchard Park, New York | (716) 697-5928 | rayoonbaco@yahoo.com
The Receipts: portfolio | LinkedIn | GitHub

BUILDER PROFILE

AI-assisted product builder with 18+ years of business experience translating complex questions into practical decision support. I investigate unfamiliar problems, define useful prototypes, direct AI-assisted implementation, test failure modes and publish inspectable evidence. Seeking a paid role or project with a team building practical AI tools.

SELECTED BUILDS & COMPETITION EXPERIENCE

Housing Navigator | Solo Global AI Hackathon submission | October 2026
Hack-Nation 7th Global AI Hackathon, RealPage challenge; participated at the Carnegie Mellon hub. Working demo | Source and evidence

Built an address-and-date housing-rule prototype with six resident questions and a “Check my homework” evidence view. The documented release contains 310 rules and 500 addresses across four dates; repository records include 72 offline engine tests. Preserved unknown facts, source gaps and failed checks. Saved-result prototype, not legal advice.

Artificial Stupidity | Evidence-gated AI research prototype | Demo | Repository

Built a KEEP, REJECT or ESCALATE authorization boundary separating AI proposals from acceptance. Published holdouts, provenance, failed tests and repairs; documented a 74-test CPU suite and an H100-backed experiment. Bounded research prototype, not a general AI-safety certification.

Bill X-Ray | Legislative decision intelligence | Demo
Turns dense legislation into plain-English decision support with evidence links, adversarial review, uncertainty and a Check My Homework layer.

Monahinga HUNTER | Geospatial decision support | Demo
Combines elevation data, 2D/3D terrain, land context, routing and explainable scoring for human field review.

BUILD PRACTICE

Independent AI Product Builder and Decision-Systems Prototyper | Self-directed | Oct 2025-present
Research and ship web applications and decision tools using ChatGPT, Claude, Codex, GitHub, Python, JSON and cloud deployment. Define the user decision, compare solution approaches, pressure-test evidence, build, evaluate and document limitations. Portfolio includes Flood Action Lens, Scout Horizon, Invisible Air Observatory and AI Draft Buddy.

PRIOR BUSINESS EXPERIENCE

Senior Financial Reporting Analyst, Nissha Medical Technologies | Jul 2023-May 2024
Associate Manager, Sales Reporting, Ivoclar Vivadent | Feb 2014-Jul 2023
Senior Financial Analyst, Ivoclar Vivadent | Feb 2005-Feb 2014

Built reporting, forecasting, profitability, scenario and decision-support systems; translated stakeholder questions and changing data into practical tools and executive insight.

EDUCATION & CAPABILITIES

BS, Business Administration, University of Louisville | University at Buffalo School of Management Data Modeling Program | 28 applied-AI certificates

Product discovery; research synthesis; rapid prototyping; prompt and system design; AI-agent orchestration; evidence grounding; adversarial evaluation; GitHub; Python; JSON; Excel; Power Query; geospatial visualization.
